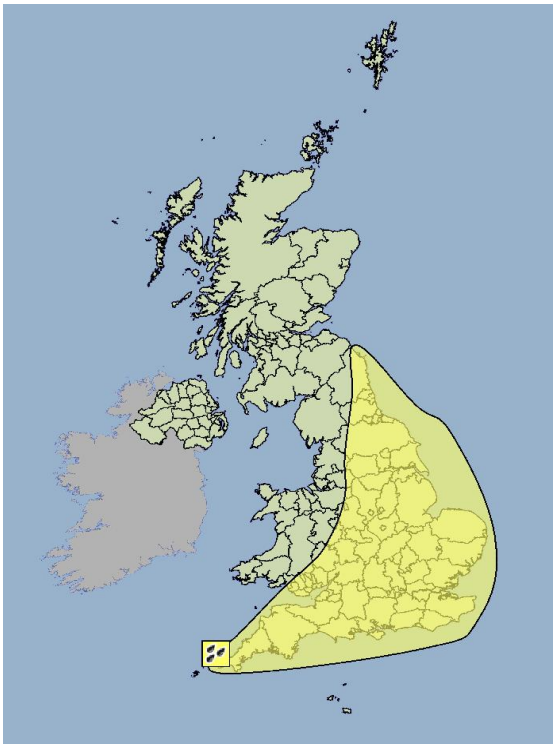
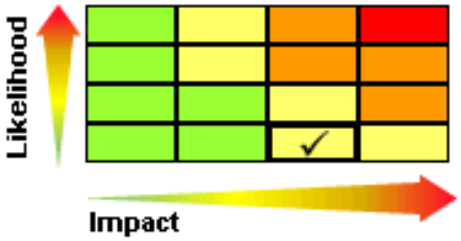
National Severe Weather Warning Service





Chief Forecasters Assessment
A front coming from the Atlantic will merge with warm, unstable air over the country to bring the risk of 30-40 mm in the hour in places and more than 50 mm in a few hours. Whilst the vast majority will have much less than this, it could cause disruption, especially if heavier bursts coincide with urban areas.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:10 on Fri, 16th Sep 2016** until **19:00 on Fri, 16th Sep 2016**

Rain spreading from the west may turn locally very heavy and thundery from early Friday, with the risk of some torrential downpours very locally.

Please be aware of the risk of some localised flooding.
